

## **§ 150.440**

conditions for cargo transfers as defined in the port's operations manual; or

(i) When prescribed by the port security plan under heightened security conditions at the port or its adjacent areas, or on vessels calling on or serving the port.

## **§ 150.440 How may the Captain of the Port order suspension of cargo transfers?**

(a) In case of emergency, the COTP may order the suspension of cargo transfers at a port to prevent the discharge, or threat of discharge, of oil or natural gas, or to protect the safety of life and property.

(b) An order of suspension may be made effective immediately.

(c) The order of suspension must state the reasons for the suspension.

(d) The licensee may petition the District Commander to reconsider the order of suspension. The petition must be in writing, unless the order of suspension takes effect immediately, in which case the petition may be made by any means, but the petition does not delay the effective date of the suspension. The decision of the District Commander is considered a final agency action.

## **§ 150.445 When is oil in a single point mooring-oil transfer system (SPM-OTS) displaced with water?**

(a) The oil in an SPM-OTS must be displaced with water, and the valve at the pipeline end manifold must be closed whenever:

(1) A storm warning forecasts weather conditions that will exceed the design operating criteria listed in the operations manual for the SPM-OTS;

(2) A vessel is about to depart the SPM because of storm conditions; or

(3) The SPM is not scheduled for use in an oil transfer operation within the next 7 days.

(b) The requirement in paragraph (a) of this section is waived if port officials can demonstrate to the Officer in Charge of Marine Inspection that a satisfactory alternative means of safely securing all cargo transfer hoses can be implemented in the event of severe weather conditions.

## **33 CFR Ch. I (7-1-08 Edition)**

### **Subpart F—Emergency and Specialty Equipment**

#### **§ 150.500 What does this subpart do?**

This subpart concerns requirements for maintenance, repair, and operational testing of emergency and specialty equipment at a deepwater port.

#### **MAINTENANCE AND REPAIR**

#### **§ 150.501 How must emergency equipment be maintained and repaired?**

All lifesaving, firefighting, and other emergency equipment at a deepwater port, including additional equipment not required to be on board the deepwater port, must be maintained in good working order and repaired according to the port's planned maintenance program and the requirements outlined in this subpart.

#### **LIFESAVING EQUIPMENT (GENERAL)**

#### **§ 150.502 What are the maintenance and repair requirements for lifesaving equipment?**

(a) Each deepwater port must have on board, or in the operator's principal office in the case of an unmanned port, the manufacturer's instructions for performing onboard maintenance and repair of the port's lifesaving equipment. The instructions must include the following for each item of equipment, as applicable:

(1) Instructions for maintenance and repair;

(2) A checklist for use when carrying out the monthly inspections required under § 150.513;

(3) A schedule of periodic maintenance;

(4) A diagram of lubrication points with the recommended lubricants;

(5) A list of replaceable parts;

(6) A list of spare parts sources; and

(7) A log for records of inspections and maintenance.

(b) In lieu of the manufacturer's instructions required under paragraph (a) of this section, the deepwater port may have its own onboard planned maintenance program for maintenance and repair that is equivalent to the procedures recommended by the equipment manufacturer.
